## INSTALLATION INSTRUCTION

### TIPS

You can use a string or rope to tie the liftgate inside handle and the liftgate lock anchor to the position you feel comfortable.

1. Prepare tools and material for installation.

{Package Included}

- a) Switch Cover
- b) "L" shape screw driver

Suggestion:  
Prepare a set of gloves and cleaning fluid to remove melt or dirty cover.

2. Press hard on Philip side of the "L" shape screw driver to remove the screws.

3. Use the Flat head side of the "L" shape to remove the switch.

4. Push in around 1/2 inch of each end to pull the switch out.

5. Be careful not to pull too much out to avoid damage the wire. The remove the cover and clean the surface.

\* Remember the wires direction for reinstall after replace cover.

6. Replace the new cover you received. **Face round and thicker side out** when insert the cover on switch.

7. Push the switch back in with even pressure on both ends.

8. Press hard on Philip side of the "L" shape screw driver to screw those screws back.

9. Congratulation! Now you complete the installation and enjoy the new designed cover for us.
